### Personal & Private

Me4Sure iPickle helps you to take all your personal data wherever you want to go. Never need to remember User Names or Passwords again. Store dozens of passwords and logins for specific applications or Websites that will automatically load your user name and passwords, safely and secure. Send and receive e-mails from any computer that has Windows. Have your favorite internet links with you and access them from any computer, the regular way or with No Trace Browsing. Work anywhere you want and carry your files with you with just a few clicks. All this comes with an interface available in 17 languages. iPickle protects all your data from unwanted access by using your unique fingerprint. You can save up to 10 different fingerprints to gain access to the data stored on iPickle. If you lose your biometric storage device the finder can see your contact details but can't see your protected data. iPickle also offers the No Trace Browsing function so all the data related to Internet surfing (Cookies, Cache, History) is stored on the portable storage device and not on the used PC and it can be deleted afterwards.

### Password Manager

Never need to remember another user name and password again. After fingerprints are authenticated, users can store dozens of passwords and logins for specific applications or Web Sites directly, automatically and are securely encrypted. This gives you simple but effective protection against phishing attacks and spyware that tracks your keystrokes.

### Favorites synchronization (Internet Explorer & Firefox)

Keep all your links with you and access them from any computer.

### No Trace Browsing with Internet Explorer & Firefox

With No Trace Browsing you can safely browse the Internet from any PC without leaving any traces that could reveal what information you accessed or what websites you viewed on the Internet.

### Outlook® synchronization & Portable Microsoft Outlook® Portable Microsoft Outlook Express®

Keep your Outlook profiles synchronized between different PCs. Have your Outlook up-to-date whether at home or work. When you are traveling, the convenient Portable Outlook functionality allows you to access all your Outlook data on a remote PC just like it would be your own. Keep all your e-mails and contacts with you and use them on computers that have Microsoft Outlook installed. Manage your contacts and emails while on the move. You can do this easily on a computer, which have Outlook Express® installed.

### Desktop, Folder to Folder and My Documents synchronization

Instant synchronization of all your documents, files, and folders. With just couple of clicks you can carry all the data files you need, wherever and whenever you like.

### Data Protection with AES encryption & USB Drive partitioning

Worried about your data integrity? Or maybe you simply like your privacy? Me4Sure iPickle protects your information with strong 128 bit encryption. Now you can partition your USB drive just like your PC. You can store your public files, as well as, private information on the same USB device, but on different partitions.

### Data Compression

Ever wished your USB drive had some extra megabytes? Me4Sure iPickle lets you compress your data on the fly and save space on your drives.

### Lost and Found

Let the finder(s) know who you are but don't let them see what's on your Flash Drive.

Me4Sure iPickle is a flash drive with swipe fingerprint authentication engine. Housed in a secure slide, users simply pull forward the sliding cover; both USB plug and sensor are securely protected. The Me4Sure iPickle provides the ability to move seamlessly from one PC to another PC.

With state-of-the art live sliding chip sensor, only enrolled fingerprints can access the data stored in the iPickle. Me4Sure iPickle is a truly Plug & Play peripheral without installation of the driver. iPickle provides availability to securely identify the users for performing operations on Password Protection, Data Protection/Compression, Mobile My E-mail and Mobile My favorites synchronization (Internet Explorer & Firefox) & No Trace Browsing with Internet Explorer & Firefox, and has multilingual user interface with 17 different languages.
